

Case Study

New Jersey, USA Based Multinational Fast-Food **Restaurant Get Solution with NetSuite Service**

Client Overview:

USA Based multinational fast food restaurant franchise that specializes in sandwiches, salads, wraps and drinks. The client has an EDI platform for managing purchase orders with their suppliers.

Problem Statement:

With the third-party EDI platform, the client encountered numerous challenges and problems when attempting to build new products through NetSuite integrations and receive order acknowledgement from the vendor.

Solution Provided:

Developed a custom import tool that allows vendors to submit product information in CSV file format. Our backend procedure reads the CSV file and creates a new NetSuite product from the information.

Created a custom vendor portal within NetSuite by creating dynamic pages and tabs for the following features.

- Purchase Order Acknowledgment process,
- Fulfilment Management
- Generating Vendor Bills

Performed NetSuite data migration activity to migrate all the vendor information in NetSuite.

Benefits to Client:

- 1. It aided the vendor in launching numerous new products simultaneously in NetSuite.
- 2. It aided the end user in efficiently managing the procurement process.
- 3. Free There are no extra costs or membership fees.
- 4. The client can grant n... Users access to the unique site.
